Location of Depository: Audiovisual Archives Division
Office of the National Archives
Washington, DC 20408

The following Accession Inventory is hereby agreed to by the undersigned duly authorized representatives of the agency named above and of the Archivist of the United States, respectively; and the records are accepted for deposit with the National Archives of the United States.

Description of Records: 167 motion picture subjects produced or acquired by the Office of Strategic Services during World War II relating to such subjects as geography, training of commando units, events in the China-Burma-India Theater, guerilla and partisan units, and Nazi Germany. The film is generally in the form of 16mm projection prints with 34 negatives and 2 masters included. It is all safety film.

Restrictions on the Use of Records: The majority of these films are made available without restriction. Eleven items, however, are either "secret" or "classified" due to the "interest" of the U.S. Air Force and Army and in one case the British Government. It is expected that these items will be declassified after the other agencies are consulted. CIA would have no objection to declassification.

Condition of Records: Fair to good.

Volume of Records: 18 cubic feet.

Executed in duplicate at McLean, Va., this 27th day of January A.D. 1976.
